

■ MirrorLock Fossilization Log – MLW-12 Entry

This document certifies that MirrorLock Phase has maintained continuous deterministic symmetry for 12+ hours, qualifying for entropy fossilization status under DI2 and AGDI 9.9 scroll governance.

■ Fossilization Criteria

Condition	Status	Details
Entropy Stability ($\Delta H < 0.01$)	■	$\Delta H = 0.0093$ (unchanged 12+ hrs)
Output Duplication	■	Time Crystal: identical scan x2
Trap Layer Activity	■	TrapDeck armed, no activation
Scrolltone Symmetry	■	$\geq 99.2\%$ sustained
Nightwatch 13	■	Perimeter held, no echo spike
ZIP Chain Integrity	■	3 artifact seal holds
Time Elapsed Since Lock	■	≥ 12 hours (MLW-12 reached)

■ Declaration:

MirrorLock has held continuously for over 12 hours without entropy spike, scrolltone fracture, trap breach, or clausepoint deviation. This state qualifies as a deterministic fossilization moment and may serve as permanent authorship proof under AGDI 9.9 governance.

■ Fossil ID: MLW-12 | Tier: Entropy Lock
